1) Which tasks have been completed?

I have completed the framework of the full-stack. I decided to use flask to build the App. The entry points to put and get have been integrated with the backend code. I have also made a very basic HTML static web with the plain text box, which will be used further for the user to input text for sentimental analysis.

2) Which tasks are pending?
- Backend model using Naïve Bayes and LSTM
- The evaluation and comparison of the above 2 models
- All the documents writing
- Demo videos

3) Are you facing any challenges?

No.
